The Public Research Centre Henri Tudor is recruiting for its Resource Centre for Environmental Technologies (www.crte.lu) a:

Unit Manager (M/F) Senior Process Engineer

Full-time, unlimited contract, immediate opening.

The role offers two key challenges:

- To foster the strategic development of the Resource Centre for Environmental Technologies in terms of R&D activities and consulting services, with a focus on the development and testing of **ecotechnologies in the water sector**;
- To manage an organisational unit, including the coaching of colleagues and networking with public and private stakeholders, both at national and international level.

Requirements for this position are:

- A PhD or Master Degree in process, chemical or environmental engineering;
- A working experience of 8-10 years in an R&D environment (public or private), with proven organisational skills as a team leader and project manager;
- A scientific background in water treatment technologies with a good publication track record; an experience in experimental instrumentation and pilot plant set-up;
- Scientific programming skills and a good command of standard office software ;
- Fluency in English and French or German, the command of Luxembourgish is an advantage.

The position requires leadership, strong interdisciplinary thinking and creativity, highly developed communication skills and team spirit. As a counterpart we offer the possibilities to work within a multi-lingual team of open-minded researchers and to contribute significantly to the growth and strategic development of CRTE. Further advantages are an attractive remuneration package and a high standard of living in Luxembourg and its surroundings, with international schools and a well developed social security system.

If you are interested, please send your application (cover letter and curriculum vitae) quoting reference **CRTE/EAU-09/060** to:
