*Seeds of excellence are present, a culture of quality is emerging, impact orientation is gaining momentum and collaboration between institutions is advancing.*

## A RECEVOIR

Excellence and long-term socio-economic benefit. These are the two cardinal values that must guide the path of Luxembourg's public research. It is only by applying these two principles rigorously that the Luxembourg National Research Fund (FNR) can achieve its ambitious goal of establishing Luxembourg as a knowledge-based society focused on science, research and innovation, in order to contribute to the economic diversity, social well-being and the future prosperity of our country.

Within only two decades, Luxembourg's public research has already come a very long way. Seeds of excellence are present, a culture of quality is emerging, impact orientation is gaining momentum and collaboration between institutions is advancing. Finishing the high growth start-up phase that commenced at the turn of the millennium, public research has now entered its consolidation phase, during which it will have to prove its excellence and quality in a fiercely competitive worldwide research landscape.

The role of public research is to be the driving force of the Luxembourgish research ecosystem. It has the potential to fuel others, but to achieve impact, it also needs the determination and the energy of the private sector. The Luxembourg public research ecosystem is young, attractive and dynamic, and the Belval R&I Campus, which embodies both the country's past and the future of research, is its impressive showcase. Abroad, the excellence of the ecosystem is a supplementary asset for the country, because it has an undeniably unique business card.

In 2019, the Luxembourg National Research Fund will celebrate its 20<sup>th</sup> anniversary. Since its creation back in 1999, the FNR has played an essential leading role in the

development of this vibrant research ecosystem, driving the national strategy and keeping high the standards of excellence in research and socio-economic impact.

For the upcoming four years - the current multiannual contract with the Government goes for the period 2018-2021 - the FNR has the firm intention to continue in that direction, and it will dedicate a total budget of 341 million euros to make continued progress in the realisation of its vision and mission.

To achieve this realisation, three strategic objectives have been set, articulated around six key value drivers. The FNR also wants to push forward a competitive and comprehensive culture of excellence and has therefore defined six dimensions that constitute the agency's understanding of "excellence in research". Scientific excellence will evidently remain the key criterion throughout the FNR schemes, but it will be tied to strategic considerations and a greater emphasis on the generation of economic and societal impact through research.

As unambiguously formulated in its mission, the FNR will continue to put all its efforts in setting up a sustainable world-class research system in Luxembourg that will generate societal and economic impact in key strategic areas. One further step towards that goal is the redefinition process of the national research priorities, for which the FNR has been mandated by the Ministry of Higher Education and Research, an important process that took place in 2018 and will be finished by mid-2019.

*Marc Schiltz, Executive Head*

## WHAT WE DO

The Luxembourg National Research Fund (FNR) is the main funder of research activities in Luxembourg. The FNR invests public funds and private donations into research projects in various branches of science and the humanities, with an emphasis on selected core strategic areas. Furthermore, the FNR supports and coordinates activities to strengthen the link between science and society and to raise public awareness for research. It also advises the Luxembourg government on research policy and strategy.

## OUR VISION

To establish Luxembourg as a leading knowledge-based society through science, research and innovation, thereby contributing to the country's economic diversification and future prosperity.

## OUR MISSION

To set up a sustainable world-class research system in Luxembourg that will generate societal and economic impact in key strategic areas.

## OUR STRATEGIC PRIORITIES

The FNR aims to be a driving force for Luxembourg's innovation capabilities and focuses on the three following strategic objectives to foster research with impact:

- Attaining scientific leadership in key areas**  
 By setting the highest quality standards, the FNR contributes to establishing international research excellence in Luxembourg. By attracting and training the most talented scientists, the FNR helps to build critical mass in key research areas, thereby supporting economic development and societal progress.
- Turning public research into a competitive advantage for Luxembourg**  
 The FNR supports the advancement of Luxembourg's knowledge-based economy by supporting industry-informed research, by reinforcing co-operation between public research and innovative industries and by facilitating the commercial exploitation of research results.

- Anchoring Science and Research in Society**

The FNR promotes the active involvement of researchers and scientists in addressing current and future societal challenges. To ensure that research is established sustainably in the public consciousness as an important pillar of Luxembourg's knowledge society, the FNR supports an active exchange between scientists and the public at large.

## HOW WE WORK

Our most highly valued criteria are excellence and quality in research. In order to identify the most promising and most excellent projects and researchers, we systematically submit funding requests to an assessment by independent international experts. The FNR implements the "Principles of Scientific Merit Review", which embody the highest international standards of expert assessment, transparency, impartiality, confidentiality and integrity.

## OUR CORE VALUES

- Towards researchers and research institutions**  
 We implement a fair and transparent process in our decision taking and nurture an open dialogue with the scientific community.
- Towards the government, tax-payers and donors**  
 We are accountable for the usage of funds that we are entrusted with and we strive for efficiency in our operations.
- Towards the general public**  
 We care for the long-term interest of the country and consider engagement with society as a constitutive part of science.
- Towards our collaborators**  
 We aim to stimulate talent-development and competence building of our staff, who translate the FNR's vision, mission and core values into action.

# 2019 ACTIVITY REPORT

*In 2019, the FNR celebrated its 20<sup>th</sup> anniversary of creation.  
A number of events and activities took place under that label.*

## I. MAJOR PROJECTS

The FNR finalised the “Revision of national priorities for public research”<sup>1</sup> report in close consultation with Ministry for Higher Education and Research. After discussions with international experts, researchers, research institutions and national stakeholders, the FNR’s proposal for new priorities was sent to the Ministry in April. Further consultations took place with other Ministries. The final National Research Priorities<sup>2</sup> are part of the “National Research and Innovation Strategy for Luxembourg”<sup>3</sup>, which approved by the Government in December 2019. The new set of national priorities will be incorporated into FNR’s calls for projects from 2020 onwards.

Over the past two years, the FNR CEO had set up regular meetings (4 times per year) with the CEOs of all research institutions (University, LIH, LIST, LISER) to coordinate strategic actions on a national level and to exchange on strategic and policy issues. This group was formalized as part of the National Research and Innovation Strategy for Luxembourg into a *Strategic Steering Group (SSG)*, now chaired by the Ministry. The initiative « Research Luxembourg » has been set up as a joint endeavour to promote Luxembourg research at the an international level. Similarly, a joint Workig Group has been set up to define a national action plan for promoting gender equality in research.

In an effort to achieve an increase in the number of women in leadership roles in the academic and research

sector, the FNR had introduced the condition that at least 40% of submissions for the ATTRACT programme come from female applicants for the period 2017-2021 (30% for PEARL). After three calls, this condition remains a long way from being fulfilled. Hence, for the ATTRACT 2020 and subsequent calls, the FNR has introduced the requirement of gender parity (by the institution) for the submission of dossiers.

In July, the FNR and the C<sup>2</sup>DH announced the recruitment of Professor Dr Sean Takats, an internationally renowned expert on digital history, backed by an FNR PEARL Chair. Professor Takats’ PEARL project aims to transform historical research practises to meet the demands of the digital age and establish Luxembourg as one of the global leaders in digital history research and development. The project named DHARPA (Digital History Advanced Research Projects Accelerator) will assess the impact of technology on historical research, and it will experiment with how technology can reshape the methodological underpinnings of history as a scientific discipline.

In October, Professor Gilbert Fridgen has been appointed the inaugural PayPal-FNR PEARL Chair in Digital Financial Services which will allow him to conduct scientific research at the digital transformation of financial services and the intersection of finance and technology. This unique funding through PayPal and the FNR PEARL programme has an initial duration of five years.

<sup>1</sup> <https://www.fnr.lu/prio-fnr-propositions-government/>

<sup>2</sup> <https://www.fnr.lu/national-research-priorities-for-luxembourg-approved/>

<sup>3</sup> [http://www.mesr.public.lu/presse/communiqués/2020/FEVRIER-2020/Presentation-de-la-strategie-nationale-de-la-recherche-et-de-l\\_innovation1/09711\\_MESR\\_SnRI\\_Broch\\_en\\_WEB\\_002\\_.pdf](http://www.mesr.public.lu/presse/communiqués/2020/FEVRIER-2020/Presentation-de-la-strategie-nationale-de-la-recherche-et-de-l_innovation1/09711_MESR_SnRI_Broch_en_WEB_002_.pdf)

It is jointly supported by PayPal and the Luxembourg National Research Fund (FNR) and hosted at the Interdisciplinary Centre for Security, Reliability and Trust (SnT) of the University of Luxembourg. Gilbert Fridgen is a renowned expert in blockchain, systems engineering and information technology platform development, with extensive and very successful experience with private-public partnerships. He is founder and co-director of the Fraunhofer Blockchain Lab.

The FNR published the results of the opinion poll on the perception of science and scientific research, the detailed results of which are available at [fnr.lu](http://fnr.lu). The survey observed a steady rise of interest in science and scientific research. Approximately 61% of the population say they are interested in science and research in Luxembourg. This overall score has risen by 18 percentage points compared with 2013. The population has a very positive view (68%) of research that raises knowledge, even if it does not have an immediate impact. A clear majority (77%) believe that even a small country like Luxembourg should carry out scientific research.

Since 2013, the recognition level of the FNR has risen by nine percentage points up to 70%.

The second edition of "Pairing scheme - Politics meets Research" project, initiated in 2016, was organised in 2019. It has been carried out in close cooperation with Parliament (*Chambre des députés*). Following a call for candidates, 13 'couples' were formed - each comprising a researcher and a Member of Parliament. The 'pairs' meet at least twice in their respective professional environments. The objective was to establish sustainable links between the world of politics and research. Tracy Brown, director of the NGO Sense about Science was invited to the closing ceremony of this second edition at the Parliament, to give a keynote speech on why evidence matters in political decision making.

In December, the FNR co-organised the 12<sup>th</sup> edition of the Science Festival, a four days festival taking place in the Neumünster Abbey and the Natural History Museum in Luxembourg City. During four days scientists, researchers, science communicators and the audience had the opportunity to communicate with each other and to experiment. With 56 experimental workshops, 7 interactive shows and 2 exhibitions, the Science Festival invited young and old to participate in the experiments and presentations actively. Some 12.000 people participated in this 12<sup>th</sup> edition.

The FNR continues to be a very active organisation on the European and international level, through its engagement with partner research funding agencies and its participation in international associations, and its contribution to international research policy networks. On 27<sup>th</sup> November, the FNR CEO Marc Schiltz was re-elected for a second 2-year term as President of Science Europe, the European association representing the main national research funding and performing organisations. He was also re-elected on the Governing Board of the Global Research Council, which comprises the Heads of research funding bodies from around the world.

In May, the auditor recommended maintaining the ISO 9001: 2015 certification (No. 9108637133, [www.tuv.com](http://www.tuv.com)) for quality management systems.

## II. FNR GOVERNANCE

### Board of Directors

The Board of Directors held five meetings in 2019, chaired by Ms. Véronique Hoffeld.

The *Chairmanship* (Ms. Véronique Hoffeld, Mr. Thierry Wolter and Mr. Marc Schiltz) met five times during 2019.

The *Audit and Finance Committee* of the Board of Directors (comprising Ms. Andrée Billon and Mr. Roger Assacker) held four working sessions, three of which by written procedure.

The *Appointments and Remuneration Committee* of the Board (comprising Ms. Véronique Hoffeld, Mr. Thierry Wolter and Ms. Christiane Hoffmann) met twice in 2019.

Mr. Romain Martin succeeded to Mr. Robert Kerger as *Government Commissioner for the FNR* on 1<sup>st</sup> July 2019. The Government Commissioner attends all meetings of the Board of Directors in an advisory role.

On March 29<sup>th</sup>, the Board of Directors and the Scientific Council held a joint meeting to discuss the final FNR recommendation for the National Research Priorities document that the FNR sent to the Ministry of Higher Education and Research in April 2019.

A new Board of Directors was appointed as of 1<sup>st</sup> December 2019. Ms. Martine Reicherts was appointed Chair of the Board and Mr. Thierry Wolter was renewed for a second term as Vice-chair. The new Board members are:

- Martine Reicherts (Chair), former Director General at the European Commission;
- Thierry Wolter (Vice-chair), Member of the Executive Committee, Ceratizit, Luxembourg.
- Tania Brugoni, Director, 1535° Creative Hub, Luxembourg;
- Stéphanie Damgé, Director, Jonk Entrepreneuren Luxembourg ASBL;

- Jean-Marc Fandel, expert advisor, scale up, Luxembourg;
- Yves Fromes, doctor and research director, Laboratoire de RMN CEA-Institut de Myologie, France;
- Anouk Hilger, Director of Renewable Energy, Enovos, Luxembourg;
- Isabelle Schlessler, Director, ADEM, Luxembourg;
- Richard Sedrani, Director, Novartis, Switzerland;

### Scientific Council

The FNR's Scientific Council met twice in 2019, chaired by Mr Yves Fromes. In addition, a joint meeting with the Board of Directors was held on March 29<sup>th</sup>.

### General Management

The Executive Management Team holds fortnightly meetings under the leadership of Mr. Marc Schiltz. A total of 14 Decision-making sessions took place in 2019.

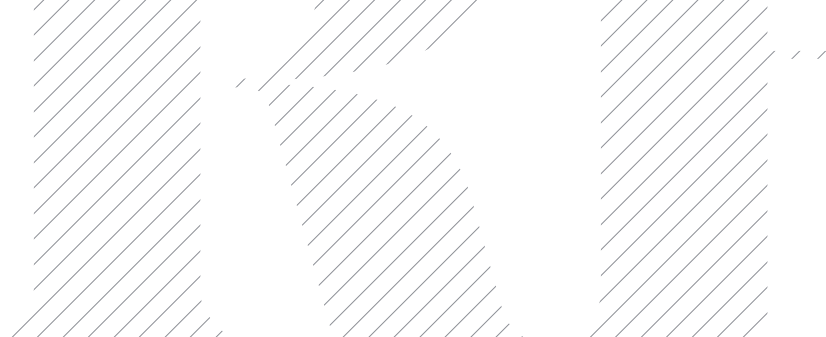

## III. PROGRAMMES<sup>4</sup> AND PRIORITY ACTIONS

The activities carried out during the year for the strategic objectives laid down in the multi-annual agreement are summarised as follows:

### STRATEGIC OBJECTIVE 1: Strengthening the foundations

- Focus on research priorities and ensure strategic alignment
- Attract and nurture talents
- Foster international cooperation

<sup>4</sup> In-depth information on the FNR's different financing instruments (CORE, OPEN, INTER, etc.) is available on the [www.fnr.lu](http://www.fnr.lu) website.

The report on the Assessment of the National Quality framework for Doctoral Training was finalized and presented in the Board. The FNR implemented key recommendations for Doctoral training Units in the 2019 PRIDE Call.

The FNR co-organized the National PhD Welcome Day on 21<sup>st</sup> November 2019. This annual event, brings together all newly hired PhD students in Luxembourg.

The FNR provided grants for young researchers to participate in the 2019 Lindau Nobel Laureate Meeting and in the STS Forum Young Leaders' Program in Kyoto.

#### **CORE**

The FNR received 131 proposals, 123 of which were eligible. After evaluation by independent international experts, the FNR selected 40 projects for funding (including 17 "CORE Junior" proposals and 4 proposals within the framework of bilateral international cooperation), amounting to EUR 22.6 million. The five international selection panels confirmed that the selection process is being implemented according to the highest international standards.

#### **OPEN**

The FNR received 12 proposals, all of which were eligible. After an assessment by international experts, the FNR selected 4 projects, which were given a total of EUR 2.3 million in funding.

#### **INTER**

The FNR assessed 188 proposals and granted funding to 19 projects (13 bilateral, 6 multilateral) for a total of EUR 7.1 million. There was no project selected as part of the AAL and EUROSTARS programmes.

Furthermore, the FNR evaluated 16 INTER-Mobility proposals, of which 7 were selected for a total of EUR 500,000.

As part of the Fulbright programme, 2 projects were granted funding amounting to EUR 30,000.

Within the framework of international cooperation, 6 bilateral collaborations have been renewed (EMBL, ANR, RIKEN, FNRS, FWO and NCBR). A first call from ERANet CORE-ORGANIC (Susfood) was launched in autumn 2019.

In July, the "RIKEN Outpost Labs" in Luxembourg were inaugurated. RIKEN is the largest Japanese Research organisation and the FNR has been supporting the collaboration with Luxembourg since 2015, through the funding of several PhD positions at LCSB and LIH as well as through funding of exchange stays in Japan and Luxembourg of several scientists.

The FNR participated in the 2019 Annual Meeting of the Global Research Council that took place on 1–3 May 2019 in São Paulo, Brazil, with a focus on 'Addressing Expectations of Societal and Economic Impact'. Over 150 delegates attended the Annual Meeting with over 60 Heads of Research Councils participating from around 50 countries to share good practices and discuss research funding policy issues.

**RESCOM**

The FNR assessed 16 proposals, 12 of which were retained for a total budget of EUR 400,000.

**OPEN ACCESS**

The FNR evaluated and retained 2 proposals for a total budget of EUR 14,000.

**AFR**

The panel of experts assessed a total of 119 eligible proposals, 30 of which were retained for a total budget of EUR 5.6 million.

**PEARL**

As part of the 2018 PEARL call for projects, three PEARL projects were submitted, one of which was selected and received EUR 3.1 million in funding in 2019: Dr Sean Takats' project (University of Luxembourg/C<sup>2</sup>DH). The recruitment process for the "PayPal-FNR PEARL Chair in Digital Financial Services" was finalised in 2019 with the arrival of Professor Gilbert Fridgen (University of Luxembourg), who will start in January 2020.

**ATTRACT**

In 2019, four (male) candidates applied for the ATTRACT programme. The FNR selected one candidate, Dr Thomas Cauvin (University of Luxembourg/C<sup>2</sup>DH) for a financial contribution of EUR 2 million. In mid-2019, the 2020 call was launched (incorporating the conditions of gender parity and co-financing). At the end of 2019, five preliminary projects were received (three submitted by men, two by women), of which four were invited to submit a developed project. The evaluation process will continue until spring 2020.

**PRIDE**

In summer 2019, the third PRIDE call was launched. Based on the final report of the external evaluation of the implementation of the "National Quality Framework for Doctoral Training", a number of recommendations, concerning doctoral training and supervision, have been incorporated into the new guidelines. At the end of 2019, nine proposals were submitted by Doctoral Training Units (DTU). The evaluation process will continue until spring 2020.

**NCER-PD - National Centre of Excellence in Parkinson Disease Research**

At its meeting in January 2019, the steering committee confirmed the very positive progress of the research competence centre "NCER-PD", and approved the funding of the second phase for an amount of EUR 6 million. Please note that the steering committee will be changed to a "Scientific Advisory Board".

## **STRATEGIC OBJECTIVE 2:** **Shaping a shift in Luxembourg**

- Stimulate knowledge transfer and entrepreneurship through cooperation with economic and societal actors
- Anchor Science in Society

### **JUMP (Proof of Concept (PoC), Pathfinder)**

The FNR assessed 20 Pathfinder proposals and granted funding to 13 projects, totalling EUR 500,000.

The FNR evaluated 14 Proof of Concept proposals and granted funding to eight projects, totalling EUR 1.7 million.

### **Knowledge & Innovation Transfer Support (KITS)**

As part of the KITS programme, a project was evaluated and retained for an amount of EUR 300,000.

### **BRIDGES and Industrial Fellowships**

A total of 27 BRIDGES projects and 24 Industrial Fellowship projects were evaluated. 17 BRIDGES projects, receiving EUR 5.7 million in funding, and 15 Industrial Fellowships projects, receiving EUR 2.7 million in funding, were selected after evaluation.

### **IPBG**

As part of the "Industrial Partnership Block Grant" (IPBG) programme, launched in 2016, a request was made by the SNT and SES, the evaluation of which took place at the end of the year. The financing of this project is budgeted for 2020.

### **Public2**

There was no programme call in 2019. Various discussions have been held with the Ministry of Agriculture and the Ministry of Defence with a view to launch joint calls for co-financing research projects.

### **INITIATE**

As part of the INITIATE pilot programme, launched at the end of 2019, a request in the field of digital health (CLINOVA) was assessed and received EUR 300,000 in financing.

### **PSP**

PSP-Classic: the FNR evaluated 38 project proposals and granted funding to 30 projects for a sum of EUR 700,000.

PSP-Flagship: a new call was closed in September 2019. Three projects have been submitted and are under evaluation.

### **Science in Society**

To strengthen the exchange between researchers and society, the FNR has taken the following steps:

**Events:** In collaboration with the National Museum of Natural History (MNHN), the FNR co-organised the 12<sup>th</sup> Science Festival at the Neumünster Abbey with 56 workshops, 7 shows, 2 exhibitions - the event attracted around 12,000 visitors. As part of the "Chercheurs à l'école" initiative, 101 researchers visited 56 classes in 30 high-schools in Luxembourg. The "Pairing Scheme" took place for a second time, with 13 researcher-politician couples. The FNR also launched the "Evidence Matters" project with the NGO Sense about Science and the Irish Science Foundation. In May 2019, the FNR invited the famous German YouTuber and moderator Mai-Thi Nguyen-Kim for a speech (160 participants) and training (27 participants) as part of the cooperation between the FNR and Wissenschaft im Dialog for the FastForward Science competition. Finally, the FNR organised a second "Science Communicator Networking Event" which brings together all stakeholders in the field of scientific communication in Luxembourg; 60 participants took part.

**Media:** In 2019, the FNR renewed its existing "Mr Science" media partnerships with RTL Télé Lëtzebuerg, RTL Radio and Eldorado. The science.lu website continues to attract and retain readers. Since its launch, it has gained

more than 2,500,000 views and 1,300,000 unique visitors to the website; it also has almost 24,000 Facebook fans, 1,100,000 views on YouTube, 1,200 followers on Twitter and 1,500 on Instagram. In 2019, the “science.lu” media partnership with Radio 100.7 was renewed and three new partnerships with RTL Today, RTL 5 minutes and the Lëtzebuerger Journal were launched.

**Training:** The FNR offered 14 training courses (for researchers, teachers, educators) in the field of scientific communication and popularisation, including a new training course for primary school teachers which was set up in cooperation with SCRIPT on the basis of a new section - science.lu “Ideas for teaching science at basic school”. The latter is now offered through IFEN.

#### **FNR AWARDS 2019**

For the eleventh consecutive year, the research and innovation community met in the Halle des poches à fontes in Belval to reward the best researchers and scientific mediators in the country, as well as their respective institutions. During this 11th FNR Awards, the Fonds National de la Recherche (FNR) awarded six prizes for excellence. These prizes were awarded in the categories “Outstanding Scientific Publication”, “Outstanding PhD Thesis” and “Outstanding Promotion of Science to the Public”; each winner received EUR 5,000.

#### **Promotion of FNR activities**

The FNR regularly communicates via its website [fnr.lu](http://fnr.lu) as well as via its digital channels (LinkedIn, Twitter, Facebook and FNRInfo), to inform the scientific community and the general public about its activities, as well as the results of Luxembourg research. By way of example, the miniseries “Spotlight on Young Researchers” displays portrait-interviews on [fnr.lu](http://fnr.lu) that highlight early-career researchers across the globe, with a connection to Luxembourg. In November, the FNR organised its first hybrid event, mixing science and theatre (The House of Frankenstein). This event brought together citizens and researchers in order to encourage dialogue between these two groups.

The FNR actively supports the project to create a common brand for Luxembourg public research « Research Luxembourg », a project initiated by public research stakeholders with the aim of promoting the project at international level.

#### **STRATEGIC OBJECTIVE 3: Promoting Innovation in Strategic Research Management**

- Become an innovative Agency

An strategic plan on Innovation within the FNR has been developed and will be presented to the Board in 2020.

We have started to build up in-house competences in the field of Science of Science and Innovation Policy. Dr. Cindy Lopes-Bento has a joint appointment at FNR and at KU Leuven university. She is an expert on quantitative assessment of science and innovation strategies and policies. At FNR, she will set-up the infrastructure and analytical tools to perform more rigorous monitoring and assessment of the outcomes and impact of Luxembourg research efforts.

FNR has started a collaboration with the Swiss publisher Frontiers to use advanced AI tools for the selection of Experts and reviewers.

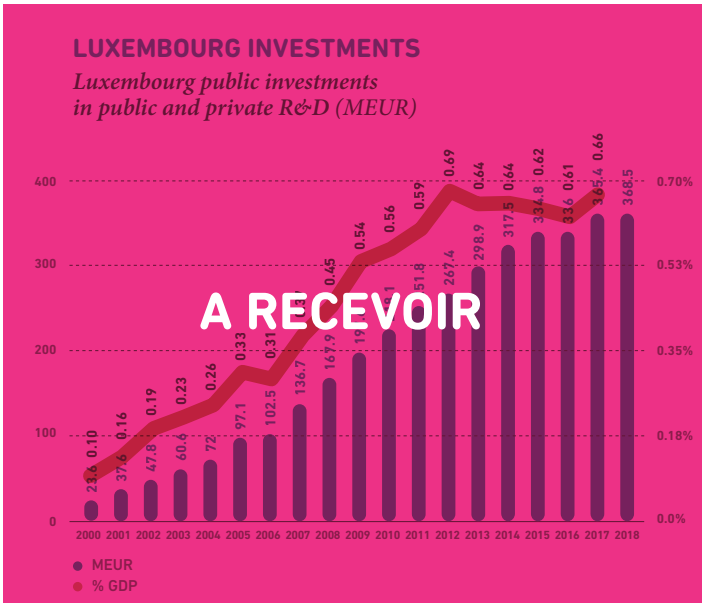

Various upgrades of our information systems have started and will continue over the next two years.

## FUNDING INSTRUMENTS

### STRATEGIC OBJECTIVE 1: Strengthening the foundations

#### CORE

CORE is a traditional programme for the funding of research projects. Proposed projects are submitted by the research institutions (*bottom-up* approach) and are part of the national research priorities defined by the Government (*top-down* approach). The projects are selected on the basis of their scientific quality.

#### INTER

The objective of the INTER programme is to strengthen international cooperation and increase the impact of research activities in Luxembourg by promoting research projects which combine Luxembourg and foreign researchers. The programme is currently in three segments: (1) the international mobility programme, (2) bilateral cooperation, and (3) multi-lateral cooperation. The projects are selected on the basis of their scientific quality.

#### RESCOM (Support for Research Communication)

The objective of the RESCOM instrument is to promote communication and exchange between researchers, notably by subsidising scientific events of an international scope.

#### OPEN

The OPEN programme allows researchers to submit research projects whose themes are not covered by the fields of the CORE programme and therefore make it possible to identify research groups which are competitive at international level outside national priorities. The projects are selected on the basis of their scientific quality.

#### PEARL

The PEARL programme aims to contribute to developing a truly critical mass and international visibility of research priorities in Luxembourg both in quantitative and qualitative terms. The principal aim of PEARL is to offer a flexible and highly attractive tool to institutions so they can attract more experienced and established researchers who are recognised at international level. These parties will transfer and develop their research programmes to Luxembourg and thereby contribute to accelerating the development of national priorities.

#### ATTRACT

The ATTRACT programme aims to strengthen the excellence of Luxembourg research by attracting researchers of an excellent scientific level who are able to draw upon recognised professional experience in research. The programme offers researchers not yet established in Luxembourg the opportunity to set up their own research in a public research body in Luxembourg which is prepared to accommodate them with a jointly submitted project.

#### AFR (Aides à la Formation-Recherche) Individual

The AFR programme is one of the FNR's longest-running funding schemes and now serves the specific purpose of providing funding to the best researchers who are studying at doctorate levels. The AFR PhD grant scheme is divided into two sub-categories: AFR PhD in Luxembourg (AFR Incoming) and AFR PhD abroad (AFR Outgoing).

A RECEVOIR

## **STRATEGIC OBJECTIVE 1:** **Strengthening the foundations**

### **CORE**

CORE is a traditional programme for the funding of research projects. Proposed projects are submitted by the research institutions (*bottom-up* approach) and are part of the national research priorities defined by the Government (*top-down* approach). The projects are selected on the basis of their scientific quality.

### **INTER**

The objective of the INTER programme is to strengthen international cooperation and increase the impact of research activities in Luxembourg by promoting research projects which combine Luxembourg and foreign researchers. The programme is currently in three segments: (1) the international mobility programme, (2) bilateral cooperation, and (3) multi-lateral cooperation. The projects are selected on the basis of their scientific quality.

### **RESCOM (Support for Research Communication)**

The objective of the RESCOM instrument is to promote communication and exchange between researchers, notably by subsidising scientific events of an international scope.

### **OPEN**

The OPEN programme allows researchers to submit research projects whose themes are not covered by the fields of the CORE programme and therefore make it possible to identify research groups which are competitive at international level outside national priorities. The projects are selected on the basis of their scientific quality.

### **PEARL**

The PEARL programme aims to contribute to developing a truly critical mass and international visibility of research priorities in Luxembourg both in quantitative and qualitative terms. The principal aim of PEARL is to offer a flexible and highly attractive tool to institutions so they can attract more experienced and established researchers who are recognised at international level. These parties will transfer and develop their research programmes to Luxembourg and thereby contribute to accelerating the development of national priorities.

### **ATTRACT**

The ATTRACT programme aims to strengthen the excellence of Luxembourg research by attracting researchers of an excellent scientific level who are able to draw upon recognised professional experience in research. The programme offers researchers not yet established in Luxembourg the opportunity to set up their own research in a public research body in Luxembourg which is prepared to accommodate them with a jointly submitted project.

### **AFR (Aides à la Formation-Recherche) Individual**

The AFR programme is one of the FNR's longest-running funding schemes and now serves the specific purpose of providing funding to the best researchers who are studying at doctorate levels. The AFR PhD grant scheme is divided into two sub-categories: AFR PhD in Luxembourg (AFR Incoming) and AFR PhD abroad (AFR Outgoing).

### PEARL

The PEARL programme aims to contribute to developing a truly critical mass and international visibility of research priorities in Luxembourg both in quantitative and qualitative terms. The principal aim of PEARL is to offer a flexible and highly attractive tool to institutions so they can attract more experienced and established researchers who are recognised at international level. These parties will transfer and develop their research programmes to Luxembourg and thereby contribute to accelerating the development of national priorities.

### ATTRACT

The ATTRACT programme aims to strengthen the excellence of Luxembourg research by attracting researchers of an excellent scientific level who are able to draw upon recognised professional experience in research. The programme offers researchers not yet established in Luxembourg the opportunity to set up their own research in a public research body in Luxembourg which is prepared to accommodate them with a jointly submitted project.

### AFR (Aides à la Formation-Recherche) Individual

The AFR programme is one of the FNR's longest-running funding schemes and now serves the specific purpose of providing funding to the best researchers who are studying at doctorate levels. The AFR PhD grant scheme is divided into two sub-categories: AFR PhD in Luxembourg (AFR Incoming) and AFR PhD abroad (AFR Outgoing).

### PRIDE

PRIDE is the FNR's new programme for funding doctoral research in Luxembourg. Under this programme, a block of PhD grants is awarded to a consortium of excellent researchers grouped around a coherent research and training programme. PRIDE is open to all domains of research and technological development. PRIDE aims at attracting excellent PhD candidates to Luxembourg and offering them a high quality interdisciplinary research training. Compared to the AFR individual grant scheme for PhDs, PRIDE provides greater advantage to institutions and PhD candidates, as institutions are able to immediately offer a full PhD grant to promising candidates without having to undergo a separate application and selection procedure at the FNR.

# ORGANISATION

## ORGANISATION

The FNR is a public institution created by statute (Law of 31 May, 1999) and enjoys legal capacity and full administrative and financial autonomy. Our overall strategy is laid down in a four-year contract with the Luxembourg Government, which also defines our budget appropriation.

### THE BOARD

Our Board supervises the organisation and approves the overall policies and strategic priorities of the FNR. It is appointed by the government and is composed of nine independent directors active in industry, business and the civil society. The members of the Board act in full autonomy.

#### Chair

*Véronique HOFFELD*, Attorney-at-law, Member of the Executive Committee and partner at Loyens & Loeff (until 11/19).

*Martine REICHERTS*, Head of the Directorate - General for Education and Culture (2015-2018). Member of the board of Directors of the Banque Centrale de Luxembourg (FNR Board Chair since 12/19).

#### Vice-Chair

*Thierry WOLTER*, Member of the Executive Board and the Supervisory Board of CERATIZIT

#### BOARD

from left to right: Richard Sedrani, Roger Assaker, Robert Kerger (Government Commissioner), Marc Schiltz (Secretary General), Thierry Wolter (Vice-Chairman of the Board), Véronique Hoffeld (Chair of the Board), Hjoerdis Stahl, Christine Hoffmann, Edmond Differding, Andrée Billon, Yves Fromes (ex-officio member)

#### BOARD

from left to right: Isabelle Schlessler, Richard Sedrani, Jean-Marc Fandel (sitting), Anouck Hilger, Stéphanie Damgé (sitting), Nadine C Martin (sitting), Marc Schiltz (Secretary General), Thierry Wolter (Vice Chairman of the Board, sitting), Martine Reicherts (Chair of the Board), Romain Martin (Government Commissioner, sitting), Yves Fromes. Not in the picture: Tania Brugnioni

### Members

*Andrée BILLON*, Executive Director of "Commission de Surveillance du Secteur Financier" from 2009-2016 (until 11/19)

*Edmond DIFFERDING*, Managing Director of Differding Consulting (Louvain-la-Neuve, Belgium) (until 11/19)

*Christiane HOFFMANN*, Manager of Lilith Project.

*Anouk HILGER*, Head of Project Development Renewable Energies at Enovos Luxembourg S.A.

### EXECUTIVE OFFICE

The Secretary General of the FNR is the chief executive of the organisation. He heads the Executive Office, implements the strategy, oversees programme development and manages all running activities. He is appointed by the Board of the FNR, subject to approval from the Government. The Executive Office is composed of more than 29 committed collaborators, who are experienced and highly-qualified professionals with a strong track record in science and research management or in the field of science communication.
